

## PROFESSIONAL SUMMARY

Accomplished Angular Developer with over 2.4 years of progressive experience in designing and implementing web applications using HTML5, CSS3, JavaScript, and TypeScript. Proficient in the MEAN stack, with a proven track record of developing scalable, high-performance solutions. Adept at enhancing user experiences through intuitive UI/UX design and seamless backend integration. Strong background in API integration, authentication & authorization, debugging, and code maintenance.

## TECHNICAL SKILLS

- **Languages & Frameworks:** Angular, JavaScript, TypeScript, HTML, CSS, Bootstrap, Angular Material
- **Backend Technologies:** Node.js, Express.js, MongoDB (MEAN Stack)
- **Tools & Platforms:** Git, NPM, Postman, Visual Studio Code, JWT, Docker
- **Other Skills:** API Integration, Authentication & Authorization, Code Maintenance, Debugging

## EDUCATION

### Bachelor of Computer Application

Sector 62, Noida, Uttar Pradesh 201301

2019 - 2021

## PROFESSIONAL EXPERIENCE:

### MEAN Stack Developer:- WebConvoy Pvt Ltd at Noida

May Present

- **Description:-** Webconvoy Pvt Ltd is dedicated to mobile and web application development, focusing on creating innovative websites. Our team comprises skilled developers, designers, and marketers fully dedicated to crafting your app with expertise and commitment.

#### Responsibilities:-

- I have successfully completed a project using the MEAN stack (MongoDB, Express.js, Angular, and Node.js). This PPF (**PAINT PROTECTION FILM**) project involved developing a robust, scalable web application designed to manage and streamline PPF accounts.
- My role encompassed Mean-stack development, where I worked on creating and integrating various features, ensuring a seamless user experience, and implementing security measures to protect sensitive data.
- Implemented RESTful APIs for seamless communication between server and client.
- I have contributed to the design of a front-end game website, focusing on creating an engaging and visually appealing user experience.
- My work included developing the overall layout, integrating vibrant graphics, and ensuring intuitive navigation.
- Login and Authentication: Implemented secure login and registration pages, including "forget password" and "reset password" functionalities to ensure user account safety.

### Angular Developer(12 to latest) :- Redmil Business Mall at Noida

April 2022 to April 2024

- **Description:** At REDMIL Business Mall, I contributed to the development of a comprehensive B2B fintech platform. This platform is designed to offer a wide range of services across various sectors, including banking, investment, and travel. The primary objective was to create a user-friendly, secure, and efficient system that caters to the diverse needs of businesses in these sectors.

#### Responsibilities:-

- Developed and maintained B2B admin panels, enhancing user experience and improving data management capabilities.
- Designed and implemented CMS solutions to allow non-technical users to manage content efficiently.
- Created support and design systems for various applications, ensuring consistency and usability.
- Integrated third-party APIs to extend the functionality of applications.
- Collaborated with back-end developers to ensure seamless data flow between front-end and back-end systems.
- Implemented authentication and authorization mechanisms to secure applications.
- Regularly fixed bugs and optimized code for better performance and maintainability.
- Developed reusable Angular components to streamline the development process and promote code reuse.
- Worked closely with backend developers to ensure smooth integration and deployment of new features.
- Conducted thorough testing and debugging to ensure the highest quality and performance of web applications.

## PROJECT

### Ssbr iNet Hub | Learning Management System

- I have hands-on experience in developing Learning Management Systems (LMS) with a strong focus on user interface design and backend functionality. One of my notable projects involved creating a dynamic dashboard using Angular and Angular Material, providing users with an intuitive and responsive interface.

### REDMIL Business Mall |Comprehensive B2B Fintech Platform

- **Overview:** Instrumental in developing a multi-faceted B2B fintech platform, catering to banking, investment, and travel sectors.
- **Key Achievements:** Developed secure login and password functionalities, comprehensive user profiles, detailed transaction and statements pages, QR Code integration, and advanced product management capabilities.

### WebConvoy | Project 1 | Project 2

- Implemented advanced authentication features, including secure login, forget password, and reset password pages.
- Managed comprehensive user profiles, ensuring detailed and intuitive profile management.
- Designed detailed transaction and statements pages, facilitating transparent financial tracking.
- Developed intuitive product, details, and order pages, enhancing user interactions.
- Created visually appealing design pages for PPF designs and implemented detailed car listings.
- Developed a blog page, providing a platform for sharing updates and articles.
